GitHub: https://github.com/nikhil09012004 Mobile: +91 9304803465

Skills

- **Programming Languages**: Python, Java, C, C++
- **Data Analysis & Manipulation**: Pandas, NumPy, Excel, Data Cleaning, Feature Engineering
- **Machine Learning**: Scikit-learn, Natural Language Processing (NLP)
- **Databases & Visualization**: MySQL, Power BI, Matplotlib, Seaborn
- **Big Data &Tools:** Git, GitHub, Hadoop, HBase, Hive

Projects

Bank Loan Dataset Analysis Dashboard- Lending Club Dataset | GitHub Aug' 25 – Dec' 25

- Designed an interactive Power BI dashboard analyzing 38K+ loan records, tracking KPIs such as $435M funded, $473M received, Avg IR ~12%, Avg DTI ~13%.
- Evaluated portfolio risk through good vs bad Loan analysis, identifying 86% low-risk and 14% high-risk loans.
- Examined regional and temporal trends, highlighting California & Texas as top regions and December as the peak application month.
- Extracted borrower and loan-purpose insights, revealing Debt Consolidation ~18K loans as dominant and lower risk for long-tenure employees.

  Tech used: Power BI, DAX, Data Modeling, Data Visualization, KPI Metrics, Business Analytics

Loan Prediction system- Loan Approval Dataset | GitHub Jan' 25 – Apr' 25

- Developed an end-to-end loan approval prediction system using Python analyzing 4,000+ loan records to automate approval decisions.
- Preprocessed data using feature engineering, scaling, encoding, and EDA, identifying key approval drivers such as income, assets, and CIBIL score.
- Trained multiple ML models Logistic Regression, Decision Tree, Random Forest, KNN, achieving ~90% accuracy with the Decision Tree model.
- Integrated model outputs with visual analytics including confusion matrices, accuracy comparison, and PCA plots for data-driven lending insights.

  Tech used: Python, Machine Learning, Power BI, Pandas, NumPy, Scikit-learn, EDA, PCA, Predictive Analytics

Training

Lovely Professional University – Data Structures and Algorithms | LPU Jun' 25 – Jul' 25

- Acquired strong foundations in Data Structures and Algorithms, including arrays, linked lists, stacks, queues, trees, hashing, and recursion.
- Implemented algorithmic techniques such as searching, sorting, greedy methods, and basic dynamic programming to solve structured problems efficiently.
- Practiced complexity analysis using Big-O notation, improving problem-solving accuracy and performance optimization skills.

  Tech used: C++, Python, Data Structures, Algorithms, Problem Solving, Time & Space Complexity

Certificates

- Privacy and Security in Online Social Media | NPTEL Nov' 25
- From Excel to Power BI | Coursera Sep' 25
- DSA using C++ | LPU Nov' 24

Extracurricular Activities

- Volunteered with Jeevan (NGO), supporting community outreach. Jun' 24
- Participated in the Binary Blitz Web Hackathon, gaining hands-on experience in web security, vulnerability analysis, and real-time problem solving. Mar' 24

Education

- **Lovely Professional University** Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 7.45*** *Aug' 23 - Present*
- **Rajkamal Saraswati Vidya Mandir** Dhanbad, Jharkhand
  Intermediate; ***Percentage: 84*** *Apr' 21 – Mar' 22*
- **Rajkamal Saraswati Vidya Mandir** Dhanbad, Jharkhand
  Matriculation; ***Percentage: 88*** *Apr' 19 – Mar' 20*
